

Delta Green

Delta Green is a variant of the Call of Cthulhu rules based on several conspiracy theories. The main Delta Green variant is set in the late 1990s.

I have run a few games using some of the Delta Green rules and regularly read at least some of the delta green mailing list. The two main scenarios I have run are:

- [The Golden Gate](#) - set in Berlin in 1953. This one is currently paused, I hope to restart.
- [Democratic Army For Truth](#) - set in modern(ish) day Britain. This one lies sleeping waiting for the stars to be right before it wakes again.

I also have a prepared one-off set in [Iraq](#) in 2003 where the agents are trying to track down some artefacts looted from the [Museum](#) in Baghdad.

There is also [Green Box Generator](#).
