

IEN

The Solar Republic's space navy. Stands for "Imperium of Earth Navy" but is more commonly called the "Imperial Earth Navy" which has a better ring to it. Most people just refer to it as the IEN.

Most of the articles listed are either biographies of people that have in the past served in the IEN (it being common for many public figures to spend a few years in their youth in either the IEN or the IAO) or in some cases about serving senior officers. There is also a category of current operational activities and new ship constructions.

• T89 - Retirement of Admiral Hamill	29 Oct 2009 22:52	An Official Spokesman
